Purpose of this report

The purpose of this report is to provide performance outcomes data on consumer satisfaction (using items from the 28-item Mental Health Statistics Improvement Program Consumer Perception Survey (MHSIP)) and quality of life (QOL), as measured by the California State Department of Mental Health's Older Adult Survey. This report is a STATEWIDE summary of the Older Adult Survey (see Attachment A) data that were collected during the November 3-17, 2003 survey period. To assist with the interpretation of this summary report, brief narratives are provided before each table presented. County reports that are similar to this STATEWIDE report can be downloaded from each county's Information Technology Web Services (ITWS) folder, which can be accessed by authorized ITWS users at https://mhhitws.cahwnet.gov/.

Consumer Demographic & Descriptive Items Summary Report

The following tables highlight the Older Adult Survey demographic items, as well as several additional descriptive items, that were reported by consumers who received services during the November 3-17, 2003, survey period and reflect aggregated STATEWIDE data. Results of these Older Adult Survey consumer-completed items are highlighted in yellow (missing data are highlighted in green), and exclude surveys that had all items missing on either the MHSIP portion of the Older Adult Survey, the QOL portion, or both. **Out of 2,467 Statewide Older Adult Surveys submitted, a total of 1,699 had valid data.**

MHSIP Consumer Survey

Summary Report

About the MHSIP Consumer Survey

The MHSIP is a 28-item consumer-completed survey designed to obtain participant perceptions of 1) access to services, 2) quality and appropriateness of services received, 3) consumer participation in treatment planning, 4) service outcomes and 5) general satisfaction. The MHSIP was developed through the collaborative efforts of the federally funded Mental Health Statistics Improvement Program (www.mhsip.org), and included the direct assistance and feedback of consumers and their families, as well as advocates for mental health services. The MHSIP Consumer Survey is currently used in a number of states across the United States.

It is important to remember that the ratings on the MHSIP represent a participant's perceptions. Some data exist to suggest that satisfaction with services, in and of itself, does not necessarily correlate with outcomes. However, the MHSIP provides a good source of information to ensure that consumers have the opportunity to shape and improve their services.

The following tables present STATEWIDE data that were collected and aggregated from the MHSIP portion of the November 2003 Older Adult Survey. The MHSIP items are rated on a five-point scale, with "5" indicating the greatest satisfaction.

The items that comprise each of the MHSIP subscales (i.e., access to services, quality and appropriateness of services received, consumer participation in treatment planning, service outcomes and general satisfaction) were averaged and then grouped into the following categories:

1.0 - 1.5 = 'Dissatisfied', 1.5001 - 2.5 = 'Somewhat Dissatisfied', 2.5001 - 3.5 = 'Neutral',

3.5001 - 4.5 = 'Satisfied' and 4.5001 - 5 = 'Very Satisfied'. As a general guideline, an overall scale score over 3.5 indicates that consumers were satisfied.

Additionally, the average scores for each of the MHSIP subscales are also reported below.

For the tables reflecting categorical groupings of the MHSIP averages and the MHSIP subscale averages, total frequencies may differ depending on how well consumers completed the items on the Older Adult Survey that comprised each scale's calculation. Averages were only calculated for those Older Adult Surveys where at least 2/3 of the items in the particular domain were completed (i.e., only 1/3 of the items could have data missing). The results are highlighted in yellow (incomplete and/or missing data are highlighted in green).

PERCEPTION OF ACCESS TO SERVICES

For the consumers who completed at least 2/3 of the items that comprise the "Perception of Access to Services" subscale, 42.9% reported that they were Very Satisfied, 47.6% reported they were Satisfied, 8.0% were Neutral, 1.3% were Somewhat Dissatisfied and 0.2% were Dissatisfied. Additionally, 4.6% of the data on this subscale had at least 1/3 of the items missing.

Quality of Life (QOL)

Summary Report

About the QOL

The OOL is designed to measure quality of life from a consumer's self-reported perspective. The subscales measured include: general life satisfaction, living situation, daily activities and functioning, family and social relationships, legal and safety, and health.

It is important to remember that the ratings on the QOL represent a consumer's perceptions. A variety of factors can affect a consumer's quality of life and many of these are out of the control of service providers. However, in our efforts to continually improve services, the QOL can be used as a source of information on issues that are important to consumers.

The following tables present STATEWIDE data that were collected and aggregated from the QOL portion of the November 2003 Older Adult Survey. Most of the OOL items are rated on a seven-point scale, with "7" indicating the greatest satisfaction regarding their quality of life. Some of the results reflect the frequency reported for particular OOL items while others reflect averages of the items that comprise each of the QOL subscales (i.e., general life satisfaction, living situation, daily activities and functioning, family and social relationships, legal and safety, and health). Using the seven-point response options as a guide, the QOL subscale results can be interpreted using the following: 1.0 - 3.9 = 'Dissatisfied', 4.0 - 4.9 = 'Mixed' and 5.0 - 7.0 = 'Satisfied'. As a general guideline, an overall scale score over 5.0 indicates that consumers were satisfied. For the tables reflecting the QOL subscale averages, total frequencies may differ depending on how well consumers completed the items on the Older Adult Survey that comprised each scale's calculation. Averages were only calculated for those Older Adult Surveys where at least 2/3 of the items in the particular domain were completed (i.e., only 1/3 of the items could have data missing).

All QOL results are highlighted in yellow (incomplete and/or missing data are highlighted in green).

GENERAL LIFE SATISFACTION

For the consumers who responded to the question – "How do you feel about your life in general?" – 6.3% were Delighted, 18.3% were Pleased, 27.0% were Mostly Satisfied, 30.5% were Mixed, 6.5% were Mostly Dissatisfied, 8.5% were Unhappy and 2.8% were Terrible. Additionally, 10.1% of the consumers did not respond to this item.
